Report on Usage Instructions for CoinCount Application

To access our CoinCount website, navigate to the following URL:
http://3.14.248.143/.

Overview:

CoinCount is a comprehensive financial management application designed for intuitive use. The interface and navigation are structured to be self-explanatory for users familiar with basic web applications.

Home Page,

- Get Started: Clicking on "Get Started" redirects users to the login and signup page.
- Navigation Buttons: The Home Page features three main buttons:
- Insights: Leads to a page with detailed insights related to our goals.
- Features: Opens a page detailing the features of CoinCount.
- About: Provides information about CoinCount and its objectives.
- Page-Specific Navigation: Each main section (Insights, Features, About) offers detailed information. A 'Home' button on every page enables quick navigation back to the Home Page.
- Each page within the system is designed for intuitive navigation. For instance, upon selecting the 'Insight' button, it leads directly to a dedicated page containing specific insights. Within this page, users will find easy access to related features and information via the 'Features' and 'About' buttons. Similarly, the 'Features' and 'About' pages reciprocate this interconnected design, allowing swift movement between sections for a comprehensive user experience.

User Account and Dashboard,

- Account Creation and Login: Users first need to sign up and then log in using their credentials. Upon login, the user is greeted with "Hello [username]."
- Dashboard Navigation: The dashboard includes:
- Dashboard: Displays a graph of total expenses, income, and savings.
- Expenses: Allows entry and management of expenses.
- Incomes: For recording and managing income sources.
- Reminders: Shows future reminders for expenses.
- Logout: To exit the account.

Expenses and Income,

Expenses Management:

- Entry Fields: Includes title, amount, date, and category (groceries, education, health, etc.).

- Expense Type: Option to categorize as current or future expense.
- Add/Delete Expense: Users can add new expenses or delete existing ones. Refreshing the page updates the total expense display.

Income Management:

- Entry Fields: Consists of title, amount, date, and source (salary, freelancing, stocks, etc.).
- Additional Notes: Option to add references or notes.
- Add/Delete Income: Functionality to add or remove income entries. Refreshing updates the total income display.

Reminders and Logout,

- Reminders: Displays upcoming financial obligations or expenses.
- Logout and Data Persistence: Logging out secures the account while saving all data. Upon re-login, previous session information is accessible.

Conclusion:

The CoinCount application is structured to be user-friendly and self-explanatory, with a focus on ease of navigation and clear functionality. It provides an efficient way for users to manage their financial data, with a focus on accessibility and user experience.
